You already understand your art. For the perfect recording, what you are missing is solid, voice-on microphone practice and specialized skills.

***We'll give you both* in our active 1.5 day LIVE, ON-MIC recording retreat.**

Class size limited to insure maximum personalized attention and practice time.

Expect focused, small-group coaching and learning. You WILL make live, practice mp3 recordings on quality microphones (the ones we use for our recordings) with immediate listening, group

feedback and focused coaching. Bring your own jump-drive so you can take home your mp3 coaching sessions for your personal review.

You can do this! The home-studio equipment you need is more affordable than ever. Learn about making your next podcast, CD or downloadable audio in your own at-home studio.

Your voice is only one of the tools you need to make a great recording. You'll get your hands, mouth, ears, mind and body immersed in the recording experiences that you and your classmates will create.

Presented by Storyteller.net. Your workshop will be led by Sean Buvala, a veteran of the storytelling movement, with more than two decades of experience as a working artist.
